

READY, RELIABLE, LOCAL

THE IMPACT:
OUR TEAM IS YOUR TEAM.

- We have boots on the ground in every location we service.
- Our service grows with you as your needs change.
- Responsive to dynamic conditions and emergency situations.
- Flexibility to accommodate ever-changing construction schedules.

Multivista’s business structure ensures that there is a local Multivista managing principal in each region in which we operate. **Our operations teams are always locally based.** We know of no other construction documentation service with as many people on the ground in as many locations as Multivista.

Our operations and development teams are part of your team. Operations personnel will attend O/A/C meetings as frequently as you like to increase awareness of the system, teach applications, review progress and otherwise make sure you are maximizing the time and cost savings that Multivista provides.

We are immediately responsive to dynamic conditions and emergency situations requiring our services. In these situations, our Operations teams can usually be on-site with less than 2-hours notice.

Since 2003, Multivista has grown to include **over 40 locations** servicing all major areas in the United States and Canada and has documented hundreds of millions of square feet of construction across ALL major vertical markets.
