

Complete Documentation. Total Asset Visibility.

Multivista is your ultimate project documentation resource. Our integrated online platform hosts all of your project photographs, videos, and webcam feeds throughout the life of your construction project.

When you choose Multivista for your construction documentation, you choose a well-developed and respected project information platform. We upload, link, manage and host all project documentation for you and your project team. All you need to do is log in to your project's documentation portal to interact with your content and project team 24/7.

Multivista is your source for:

Photo

CONSTRUCTION PHOTOGRAPHY

We deliver interactive, digital "Visual-As-Built" of your building to survive as a permanent photographic record of all of your projects. Exact-Built® photo shoots and Progression photo shoots capture the building process at every construction milestone. Using interactive architectural drawings, your project is completely documented through photos, indexed by both time and location.

Video

CONSTRUCTION VIDEOS

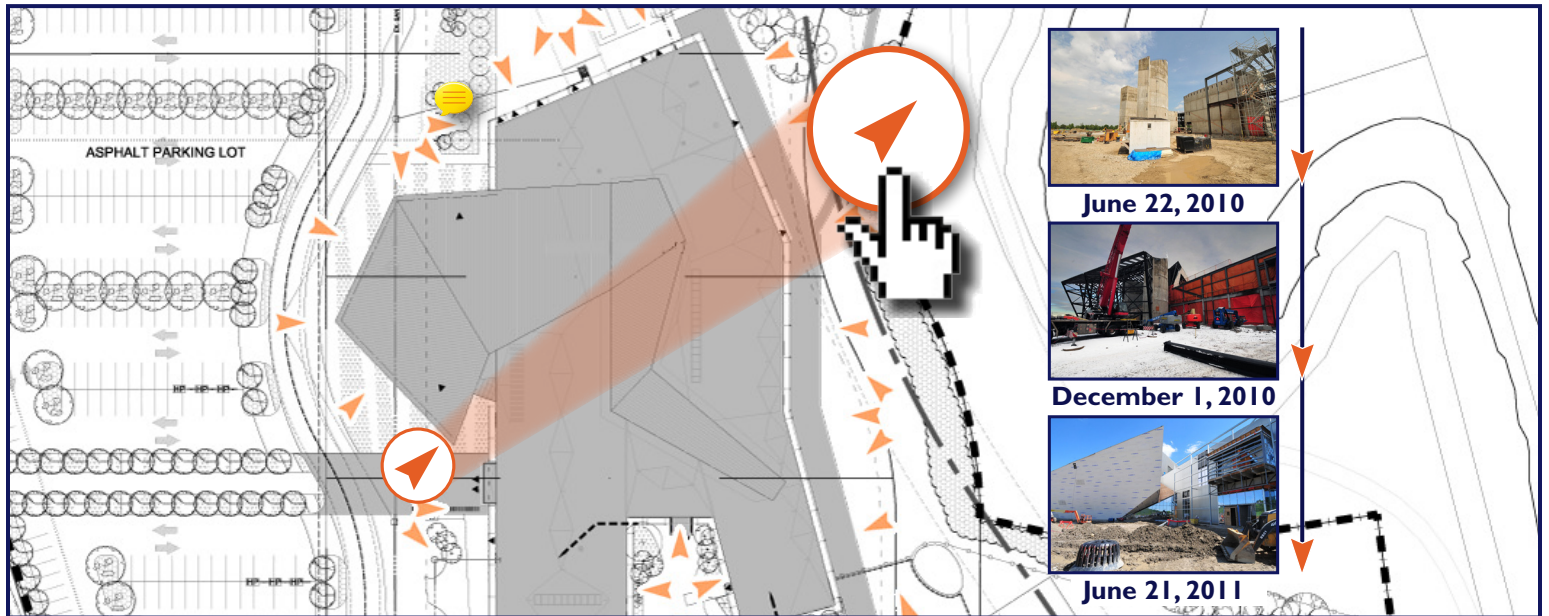

Multivista Video service is a professional, HD solution for facility maintenance in a live-motion format. Our construction videos allow users to maintain a record of the "As Delivered" construction events. Multivista Video service captures critical facility events including building walkthroughs, equipment inspections and equipment installations, training sessions, facilities maintenance instructions, and much more.

Webcam

CONSTRUCTION WEBCAMS

Multivista Webcam service provides anytime access to live conditions of your jobsite and is perfect for broad site overviews of current conditions and construction activity. Our variety of cameras can be customized to any project, from single point-of-interest solutions to complete 360-degree perspectives of the entire jobsite.

COLLABORATION - Multivista TeamTalk™ is an included feature on Multivista's project information platform. TeamTalk™ allows you to add notes, comments and tags to any of your projects, shoots or photos. This enhances communication and transparency between all project stakeholders.
