

360 PHOTO FROM MULTIVISTA

Full-Service Construction Progress Documentation

We capture **360 photos** of your entire job site —
You get current information to manage
your project more efficiently.

Get **Actionable Intelligence** from the field
into the hands of your entire project team

**INDEPENDENT, RELIABLE, AND COMPLETE DOCUMENTATION
OF YOUR PROJECT FROM BEGINNING TO END**

START

COMPLETION

What if you could walk your job site virtually with up-to-date, accurate 360 photos?

With 360 Photo from Multivista, project teams can **update schedules, demonstrate progress** to stakeholders, **resolve RFIs and change orders, manage disputes, and get paid faster.**

And unlike DIY solutions, Multivista handles all the photography and data management **for you**, because the last thing you need is something else on your to-do list.

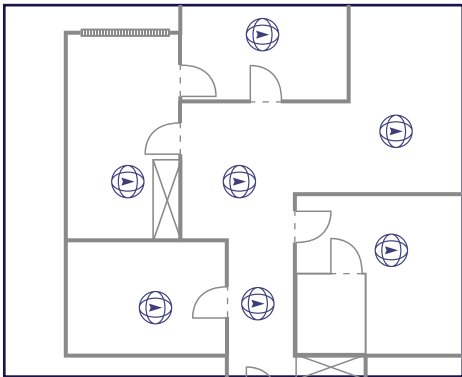

Clients work with their local Multivista office to create a schedule of progress shoots. Want weekly shoots? Biweekly? The frequency is up to you

01.

Professionally trained photographers use 360 cameras to capture comprehensive interior and exterior views of your job site

02.

Photos are made available to the entire project team via Multivista's interactive floor plans or your preferred third-party integration.

03.

Project teams use field intelligence to accelerate timelines, report to stakeholders, get paid faster, and more!

04.

APPLY TO YOUR WORKFLOWS:

1. Manage Schedules and improve field coordination

Imagine sitting with your team and updating the schedule, coordinating work in the field with trades, or walking through progress in an OAC meeting — all without leaving the trailer.

- Demonstrate progress to owners and other stakeholders.
- Review real site conditions virtually to update schedules.
- Collaborate with subcontractors and tradespeople.

2. Resolve RFIs, Change Orders, and Disputes

Accurate, up-to-date construction intelligence leads to more efficient decision making. When stakeholders can collectively review the same visual data, RFIs, change orders, and disputes can be addressed before they affect the schedule and costs.

- Respond to every RFI quickly using photographic evidence that has already been captured in the field.
- Verify completion of work remotely and complete change orders in just minutes.
- Use professionally captured 360 photos to verify claims and rapidly resolve disputes.

3. Streamline Progress Payment Applications

When your payments are tied to project progress, having accurate, frequently updated proof of progress at your fingertips is invaluable.

- Submit recent, unbiased images along with your payment applications to get paid faster.
- Pay your sub-trades quicker without waiting for your next site walk.
- Use high-frequency progressions to speed up timelines and hit your milestones.
