CREATE Services for AECO

Hexagon's Create services offer architects, engineers, construction trades, facilities managers, and planners comprehensive services in building and infrastructure modeling, 2D documentation, advanced visualization, simulations, and digital twin technology solutions. Our services help A/E firms meet demanding deadlines, assist trades with pre-construction modeling, enable owners and city planners to gain public support through realistic visualizations, and help owners realize the benefits of operational digital twins. Clients value our unique ability to provide reality capture, full lifecycle modeling, and connected digital twins from a single vendor. Avoid costly design and construction delays, inefficient operations, and inadequate employee training by leveraging our expertise in BIM and digital twin consulting and services.

CREATE Service Deliverables

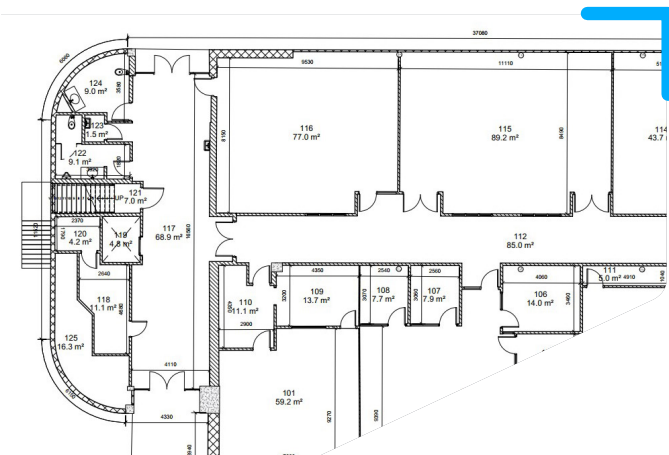

Modeling – Feasibility, Design, Construction, As-built
